	Urgent	Not Urgent
Important	**DO - MVP** ● Ask for user input for instruments and time spent. ● Save data to a csv file ● Calculate the practice session summary (total hours spent practicing and total sessions) and output it to the terminal.	**SCHEDULE** ● Ask for a focused rating on a scale of 1-5 as well and print the average for it. ● Ask for the piece played during the session and save it as data in the csv file. ● Allow the user to select and view logs for just one instrument (view only piano sessions or only violin sessions)
Not Important	**DELEGATE** ● Import the java.io.* which contains BufferedReader and PrintWriter to read and write the csv file data. ● Use java.util.ArrayList to manage and store the practice sessions (Strings containing information) in memory. ● Use java.util.Scanner to read user input.	**DELETE** ● Graphical UI ● Recommended pieces based on the pieces the user has logged. ● Ask the user for the date and calculate practice streaks. ● Automated practice recording/timing.
